

## IEC 61850 User Feedback Task Force - Bug #410

### Data models using GGIO when not needed

02/03/2021 02:07 PM - Herbert Falk

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Implementation - improve conformance testing	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>To discuss in WG10:</b>	
<b>ID:</b>	4.2	<b>Short Proposal:</b>	(2)Use of GGIO, when a standardized object is available, is not conform to the standard. We need to find a way to do "modelling assesment" - but that is not that easy since modeling may always be an issue of interpretation.
<b>Source:</b>	ENTSO-E	<b>Standard(s):</b>	
<b>TF Unique ID:</b>	4.2 # ENTSO-E	<b>Needs More Information:</b>	
<b>WG10 Proposal:</b>	Today, we have a draft 7-500 that describes the correct usage of LNs for a certain application. This can help the user for the discussion with the vendor about the data model as well as a basis for a specification of the required data model.As long as we do not have standardised basic application profiles, we can however not do a formal conformance test on that.The TF UF shall in a first step develop a guideline on how such a BAP shall be defined and what is the process to develop these BAP in close cooperation with the users.Closed because taken into account by another BAP-TF (7-6).	<b>Assigned TF:</b>	
<b>Estimated Completion:</b>	First step to develop guideline / process for BAPFirst Draft by June 2014 (Wolfgang Brodt / supported by Patrick Lhuillier)Expected completion by End of 2014		
<b>Discuss in Upcoming Meeting:</b>			
<b>Description</b>			

#### History

#1 - 02/03/2021 02:42 PM - Herbert Falk

- Status changed from New to Closed

#2 - 02/03/2021 03:56 PM - Herbert Falk

- Priority changed from Normal to High

#3 - 02/09/2021 06:19 AM - Carlos Rodriguez del Castillo

- Subject changed from Data models using GGIO too much to Data models using GGIO when not needed

- WG10 Proposal changed from Today, we have a draft 7-500 that describes the correct usage of LNs for a certain application. This can help the user for the discussion with the vendor about the data model as well as a basis for a specification of the required data model.

As long as we do not have standardised basic application profiles, we can however not do a formal conformance test on that.

The TF UF shall in a first step develop a guideline on how such a BAP shall be defined and what is the process to develop these BAP in close

cooperation with the users.

*Closed because taken into account by another BAP-TF (7-6). to Today, we have a draft 7-500 that describes the correct usage of LNs for a certain application. This can help the user for the discussion with the vendor about the data model as well as a basis for a specification of the required data model. As long as we do not have standardised basic application profiles, we can however not do a formal conformance test on that. The TF UF shall in a first step develop a guideline on how such a BAP shall be defined and what is the process to develop these BAP in close cooperation with the users. Closed because taken into account by another BAP-TF (7-6).*

*- Estimated Completion changed from First step to develop guideline / process for BAP*

*First Draft by June 2014 (Wolfgang Brodt / supported by Patrick Lhuillier)*

*Expected completion by End of 2014 to First step to develop guideline / process for BAP First Draft by June 2014 (Wolfgang Brodt / supported by Patrick Lhuillier) Expected completion by End of 2014*
