CIM Impacted Groups: WG13	Originally Assigned To:
Requestor:	
Description Use of the current hierarchical load forecast model is unclear. Model needs to be clarified and probably changed. Current load model also does not include a way to associate a load area with a control area.	
Proposed Solution 20070118/LOO This problem is also dealt with for ERCOT, evaluate their solution.	
Decision 20070927/LOO The new CIM 12 load model solves this issue. Close issue
