<b>Requestor:</b>	
<b>Description</b> Support exchange of limit values in SSH profile - Need to exchange a normal or default limit and also the present limit value. Normal limit exchanged in EQ profile and the present limit exchanged in the SSH profile.	
<b>Proposed Solution</b> Add an attribute to all the specializations of OperationalLimit using the same data type as used for the "value" attribute. Name the new attribute "normalValue". E.g. VoltageLimit.normalValue:Voltage. Document as the normal or default limit which may be used to determine the operational limit value. Also add this new attribute to EQ profile. The "value" attribute moves from EQ to the SSH profile.	
<b>Decision</b> Add these to model then review. 8/24/216 call.	
<b>Release Notes</b> Old issue. All is solved in CIM17 released standards.	

### History

#### #1 - 02/06/2023 05:50 PM - Chavdar Ivanov

- Subject changed from Support exchange of limit values in SSH profile
- Need to e to Support exchange of limit values in SSH profile- Need to e
- Status changed from New to Open
- Solution Version set to CIM17v40
- Release Notes updated

#### #2 - 02/06/2023 05:50 PM - Chavdar Ivanov

- Status changed from Open to In Progress

#### #3 - 02/06/2023 05:51 PM - Chavdar Ivanov

- Status changed from In Progress to Closed

Closing the issue as all is implemented already in CIM17.
