Initial Test Document: Amd1 TP1.1	

Description

At step 8 the client just configures the URCB without prior reservation that will fail for Ed2Amd1 but the expected result is to succeed the configuration.

Either add reservation in step8 or change the expected result to failure. The last option is tested by sRpN9, so I propose the first option to add reservation:

Change Step 8: Client1 configures the URCB.
Into Step 8: Client1 reserves and configures the URCB.

History

#1 - 11/01/2021 07:32 AM - Richard Schimmel

- File Solution to redmine sRpN5 5112.docx added
- Status changed from New to In Progress

Add "reserve" to step 8, see attached file

#2 - 11/16/2021 11:39 AM - Bruce Muschlitz

- File Solution to redmine sRpN5 5112(20211116).docx added

TWPG meeting 16-November-2021 decided that "reserve and configure" was clear enough that reserve needed to occur before configuration. Words changed to "reserve then configure".

#3 - 11/30/2021 08:32 AM - Bruce Muschlitz

- Status changed from In Progress to Resolved

#4 - 06/02/2022 02:49 PM - Bruce Muschlitz

- Status changed from Resolved to Closed
- Updated Test Document set to Server Ed2.1 TP1.2
- Closed Reason Test Procedure Update added
- Closed Reason deleted (--Not Set--)
