Description

[Jim H.] In Part 6 meeting we discussed the need for a generic Vehicle and Tool class. This is primarily a requirement from Part 7. As part of that discussion we looked at the AssetKind enumerations which we thought might be of use. However, the enumerated list is really short primarily focusing on substation assets. I also wonder how it differs from the Type attribute which is a String value.

Proposed Solution

Consider to remove AssetKind or provide a complete list
