Description The association between Organisation and OrganisationRole allows an Organisation to be associated with 0 to many OrganisationRoles. OrganisationRoles can be defined such that they may apply to more than one Organisation, such as a SchedulingAgent, or a MarketParticipant. Request that the cardinality for this association be updated to allow a 0 to many on both ends.	
Proposed Solution Update cardinality of association between Organisation and OrganisationRole to have the cardinalities of: Organisation 0..many -> 0..many OrganisationRole
