Breaking Change Description:		Origination ID: 16_0083
CIM Impacted Groups:	WG16	Originally Assigned To:
Requestor:		
Description Add marketEvaluationPointType attribute (String) to the MarketEvaluationPoint class [0..1], Originally, see Reference, the intention was to specify if the market evaluation point was for e.g. consumption, production or combined. That could however be handled using the FlowDirection class, see ebIX MR (2021/34) below. Instead the attribute would tell if the MarketEvaluationPoint is an exchange point or an accounting point.		
Proposed Solution During discussions within WG16 it was suggested to change the attribute to just type. Suggested definition: Specifies if the Market Evaluation Point is an Exchange Point or an Accounting Point. Plan to add specialized classes to represent the EvaluationPoint and AccountingPoint. Will need to provide definitions for the new classes.		
Decision Plan to add specialized classes to represent the ExchangePoint and AccountingPoint. Will need to provide definitions for the new classes. 3/24/2022: Planned to be modeled in MarketManagement package.		
Release Notes New classes added: AccountingPoint; Generalization of MarketEvaluationPoint ExchangePoint; Generalization of MarketEvaluationPoint
