Description
Add meteringMethod attribute (String) in the MarketEvaluationPoint class [0..1].
This will inform the Energy supplier how the energy volumes for the MarketEvaluationPoint are established, are they from a continuous read meter, a non-continuous read meter (e.g. yearly read/manually entered at a website), calculated or not-metered (e.g. for street lights where the energy volume doesn't come from any meter at all)?
Proposed Solution
Suggested definition: Specifies how the energy volumes are established for the Market Evaluation Point, such as continuous, non-continuous, calculated, or not-metered. 5/6: Attribute for AccountingPoint class
Decision
3/24/2022: Planned to be modeled in MarketManagement package.
Release Notes
MarketEvaluationPoint added attribute measurementMethod
