| Associate the class BusinessSector with the MktActivityRecord class (many-many-association).                                                                                                                                                                                                                                                                                    |                                                        |                                                                   |
| When exchanging master data (events) for one or more MarketEvaluationPoints, the MktActivityRecord will be used as the start of the payload for that information. Since most processes will be the same regardless of business sector, but different databases, applications or modules are used, there is a need to inform which business sector is relevant for this payload. |                                                        |                                                                   |
| <b>Proposed Solution</b>                                                                                                                                                                                                                                                                                                                                                        |                                                        |                                                                   |
| See figure.                                                                                                                                                                                                                                                                                                                                                                     |                                                        |                                                                   |
