Description Association from CommodityDefinition to RegisteredResource. And change cardinality on the association to Pnode from 1..1 to 0..1.	
Proposed Solution CommodityDefinitions are defined for a MarketProduct and optionally a Pnode. Adding an association to RegisteredResource gives the flexibility to allow a CommodityDefinition to be defined for a MarketProduct and optionally a RegisteredResource. CommodityDefinition 0..many -> 0..1 RegisteredResource Update end role cardinality for CommodityDefinition -> 0..1 Pnode	
Decision 3/24/22: Team agreed
