

CIM Issues - CIM Issues #5883

Define a standard way to define IEC 61850 data object names for MeasurementTypes and ControlTypes

07/13/2022 10:31 AM - Tom Berry

Status: New	
Priority: Normal	
Target version:	
Solution Version:	Sub-Clause:
CIM Impacted Groups: WG13	Paragraph:
Requestor: Tom Berry	Table:
Standard(s): IEC 61970-301	Origination Date: 07/13/2022
Version: CIM17	Origination ID: IEC TS 62361-102 Recommendation R13
Clause:	Originally Assigned To:
Description IEC TS 62361-102 Recommendation R13 / R14: Recommendation R13: CIM based standards should use selected IEC 61850 data object names as MeasurementType names. Recommendation R14: [Alternative to R13] add a new attribute in the CIM Measurement class called IEC 61850 DataObject, which is an enumeration and the value will be any data object that is defined in IEC 61850. Recommendation R19: CIM based standards should use selected IEC 61850 data object names as ControlType names or add a specific attribute as recommended for Measurements
