<b>Description</b>			
Server ED2 Amendment 1 TP Revision Rev 1.2 control test cases refer to Table 54. In ED2 part7-2, Table 54 is AddCuase semantic. This is not the case for ED2.1 part 7-2 anymore as Table 54 is dataset class definition.  I did not find where is the replacement of Table 54 is in the ED2.1. Does anyone know? If it is completed removed, then it is suggested to remove reference to Table 54 in this test procedure. If it is moved to somewhere else, then it is suggested to replace Table 54 with the right reference table.
