

IEC 61850 User Feedback Task Force - Bug #6226

In the downgrading rules from ed 2.1 to ed 2.0 in part 6, it is mentionned to exclude ORS CDC (I.4.2.4). Why CDCs: CST, VSD and TCS that were also added in ed2.1 are not mentionned to be excluded also ?

01/17/2023 03:05 AM - Aurelie Dehouck

| Description 61850-6 ed2.1 mention in I.4.2.4 "New CDC": "The CDC ORS has been added to the list of the allowed CDCs. DOType whose CDC=ORS shall be excluded from the export to an 2007B environment. This includes also DO instances using this type." But other CDCs were also added (cf tPredefinedCDCEnum, or 7-3): CST, VSD and TCS Why shouldn't they be excluded also ? | | | |
| Proposal descriptions CST, VSD and TCS should also be excluded. Action: Reformulate downgrading rule 2.1 to 2.0 for new CDCs to list the supported CDCs instead of the CDCs to remove. The document will be updated with IEC 61850-6 Amendment 2.2 | | | |
