Clause:	MktActivityRecord	Originally Assigned To:
Description		
<p>The current description of MktActivityRecord in the MarketCommon package is: "Subclass of IEC61968: Common:ActivityRecord." The ActivityRecord has the description: "Records activity for an entity at a point in time; activity may be for an event that has already occurred or for a planned activity." When used in the Market domain, the activity could be for an "entity" being one or more physical objects, one or more administrative objects, a set of information in a process etcetera. A first step could be to copy the description from ActivityRecord, as second step could be to discuss if the word "entity" would be the best word describing our usage. One minor update could be to replace "an entity" with "a logical or physical entity".</p>
