WG10 Proposal:	Target edition: Next
Discuss in Upcoming Meeting: No	
Short Proposal:	
Description Clause 4.2 / Table 1 of Part 7-4 lists the abbreviations used in data object names. In this list entries exist which refer to (parts of) former DO names. When removing DO / changing DO names of former versions, model managers of other Parts do not inform the Part 7-4 editor to delete the entries from the list. The standard (and the web access datamodel) expose abbreviations which are not used any more. Example: string "Ia" : 16 entries	
Proposal descriptions Set up an information channel between Parts and Part 7-4 to allow a clean-up.
