Description	
<p>Based on the agreement from the join meeting in Minneapolis 23-27 October 2023. This issues suggest to make the Name model simpler by adding a enumerator to the Name class rather than having NameType and NamingAuthority. This would make it easier to publish the relevant NameType and we can use a schama based validation rather than instance data. This would make the validation significant better.</p> <p>This issue become relevant when we in Minneapolis agreed to create an object registry profile in -452.</p>	
Proposed Solution	
Proposed solution is included in the attached document "CR CIM18 Identity.docx"	

History

#1 - 12/12/2023 10:09 AM - Svein Olsen

- File CR CIM18 Identity.docx added
- Proposed Solution updated
- CIM Keywords 61970-Core added
- CIM Impacted Groups WG13, WG14, WG16 added
- CIM Impacted Groups deleted (None)

#2 - 12/13/2023 07:58 AM - Svein Olsen

- File CR CIM18 Identity.docx added
