Description

We need to indicate the usage of Inf in a more explicit way to avoid confusions.

Proposed Solution

Agreed to add a new disclaimer note on every Inf* UML diagram indicating to "use at your own risk". This same text should be in the package Notes for each Inf* package. The below text is suggested to be used in both Grid and Enterprise. Becky can tweak as necessary for her use in the Market packages:

Disclaimer:

All informative UML modelling that is contained within the Informative packages (packages beginning with Inf*) is considered work under development and is subject to change or removal at any time. Therefore, this content should be used at your own risk. Users are encouraged to participate in and/or submit use cases to the respective UCA Task Force for additions and/or features not yet covered by the CIM.

From UTF 13 approach: #6693
The following disclaimer is added to every Inf* UML diagram the package and Notes for each Inf* package.

Disclaimer:

All informative UML modelling that is contained within the Informative packages (packages beginning with Inf*) is considered work under development and is subject to change or removal at any time. Therefore, this content should be used at your own risk. Users are encouraged to participate in and/or submit use cases to the respective UCA Task Force for additions and/or features not yet covered by the CIM.
