Short Proposal:			

Description

Following the discussion in WG10 meeting in Fribourg (Feb 25, 2025)

The definition of "deprecated element" in 7-4 should/could be updated/improved in the next edition (not in 2025 that has to be functionnaly identical)

It is currently very large and unprecise.

Add something like : "the deprecated elements should not be used in newer versions of servers" ?
